

Interactive Web Design

CSS Flexbox / Grid Test Question

Task 1 Create a new folder on your computer.

Task 1.2 Save the two images on BrightsSpace called *cave.jpg* and *filmmaker.avif* to your new folder.

Task 2 Using HTML and an externally linked CSS file, create the below layout in your browser.

World

**From coca fields to eco-tourism:
Colombian farmers embrace green
pivot**

October 16, 2024

**Blind filmmaker hopes to blaze a
trail for artists with disabilities**

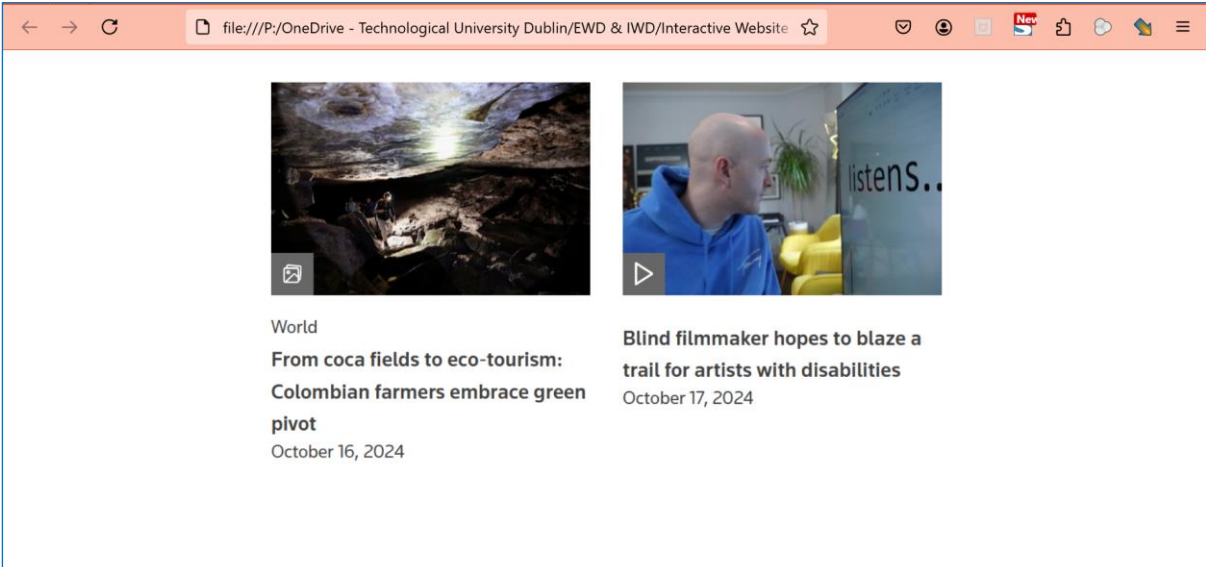

October 17, 2024

Task 3: Add at least 10px padding around the image and text.

Task 3: Write a media query so that when viewport is at least 820 pixels wide, the layout changes to the below layout.

	
<p>World</p> <p>From coca fields to eco-tourism: Colombian farmers embrace green pivot</p> <p>October 16, 2024</p>	<p>Blind filmmaker hopes to blaze a trail for artists with disabilities</p> <p>October 17, 2024</p>

Task 4: Centre the above images and text horizontally across the webpage so that it looks like the below in the browser:

The screenshot shows a web browser window with the address bar displaying 'file:///P:/OneDrive - Technological University Dublin/EWD & IWD/Interactive Website'. The page content is centered horizontally and matches the layout shown in Task 3, featuring two columns of content with images, category labels, titles, and dates.

Task 5: Please upload your HTML and CSS file to Brightspace.
